

Flat Roof Installation Training Day

One Day course details

Gain practical and technical experience of flat roof installations at one of our training sessions. The day will be delivered by one of our expert trainers.

What to expect:

- Rig installation demonstration
- Safe2Torch demonstration
- Using the flat roof equipment including gas guns
- System build up
- How each element is installed
- Installation quality assessment
- Identification of common installation errors
- Flat roof detailing

Venue

The course will usually take place at one of our training centres. For large groups, we can conduct the courses at the location of your choice.

Suitable for:

- Architects
- Building Surveyors
- Estate Management
- Facilities Management
- Property Management
- Operations Consultants
