- Previous roofing knowledge is recommended
- There is no age limit

“Carrying out the Level 2 NVQ for Reinforced Bituminous Membrane has allowed me to gain a professional qualification on the practical skills I have learnt over the years in the installation of flat roofs. It has refreshed my understanding on theoretical elements including Building Regulations and key components in health and safety, amidst installation best practice. The assessment was carried out on a project that I was working on, which meant it didn't disrupt my day and I passed with excellent support from the Langley NVQ Assessor.”

# Construction Training

## Benefits for Operatives

## Operative to Director

We have developed in excess of 40 construction training courses. Some courses address initial entry level qualifications, such as installing a particular roofing discipline. With further opportunity and access to developing managerial skills in certain areas of the business, tailoring qualifications such as Head Office operations or Site Management. The extensive offering allows for individuals to set off on a progressive career path in construction.
